## PROFESSIONAL SUMMARY

Final-year BSc Information Technology (Software Engineering) student with a focus on UX/UI design and digital product development. Skilled in user-centred design, usability evaluation, and accessible, inclusive design practices, with a portfolio of mobile app and web case studies spanning mobility, healthcare, travel, and campus safety. Combines design thinking with technical grounding in front-end development, allowing for realistic, implementation-aware design decisions. Detail-oriented, curious, and driven to design products that are genuinely intuitive and useful for the people who use them.

## DESIGN & TECHNICAL SKILLS

- UX/UI Design: User-centred design, usability evaluation, wireframing, high-fidelity prototyping, accessibility and inclusive design
- Research & Evaluation: Usability principles, user research fundamentals, iterative design evaluation
- Design Tools: Figma
- Front-End Fundamentals: HTML, CSS, JavaScript - supports realistic, developer-aware design decisions
- Other Technical Skills: SQL, C#, PHP, Git, GitHub, Visual Studio Code
- Soft Skills: Attention to detail, empathy-driven problem solving, clear communication, collaboration

## EDUCATION

|                                                                           |                       |

## RELEVANT COURSEWORK

### Usability Engineering (ITUEA2-B44)

- Studied principles and practices for designing user-centric, intuitive, and highly functional digital products and systems
- Learned to design and evaluate user interfaces that meet the needs and expectations of diverse user groups
- Covered usability, user-centred design, usability evaluation, accessibility, and inclusive design

## SELECTED PROJECTS

### Parcket - Redesigning South Africa's Ticketless Parking App

- Redesigned a mobile parking application to help drivers access parking facilities faster and manage parking sessions with ease
- Designed a centralised platform enabling QR barrier access, parking session tracking, vehicle management, payments, and parking information

### DialyzeCare - Smarter Health Management

- Designed a mobile healthcare application to help dialysis patients manage daily treatment routines and overall well-being
- Centralised scheduling, medication tracking, water intake logging, and health metric monitoring in a single platform

**EduSafe - Campus Crime Alert High-Fidelity Prototype**

- Designed a high-fidelity prototype for a campus crime alert and reporting application, with Edevos as the client and students as the target users
- Focused the design on helping students quickly report and stay informed about safety incidents on and around campus

**Tide - African Ocean Travel Website**

- Designed a travel website to help people discover beautiful ocean destinations across Africa
- Combined destination discovery, travel inspiration, and useful information in a simple, visually engaging experience

**CERTIFICATION**
